DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Blanchard. The reference to Blanchard teaches the formation of a pull-up transistor array which typically may include, for example, as shown in Fig. 1, a substrate (18), an epitaxial layer on the substrate, and an N-type DMOS transistor which has a common drain contact. In addition to the vertical device shown in Fig. 1, Blanchard also teaches (col. 1, l. 24) that lateral MOSFETs may be formed, as well.

Allowable Subject Matter

Claims 4-15 are allowed.
